Education

DePaul University Chicago, Illinois   Fall 2015 – *Summer 2017*
Major: Interactive and Social Media w/ Development Concentration
- Graduated with cum laude standing

Work Experience

GreatMoods LLC| Remote   *May 2017- Oct. 2017*
Lead Front-End Developer - Intern

- Redeveloped pages and elements using HTML, CSS, JS, jQuery, and PHP.
- Developed fully responsive pages by utilizing CSS media queries, jQuery screen width functions, and Bootstrap utility classes.
- Redeveloped around 50 pages along with all essential elements throughout the site on my own.
- Considered my boss' needs and wants for the overall design, made suggestions and compromises on the design when needed, and developed based off those discussions.
- Collaborated with my boss to determine high/low priority tasks, as to better assign tasks for the one other developer on my team.
- Quick to help my team to solve/answer any questions they had.
- Created the GreatMoods BitBucket account and maintained it as an admin.
- Trained new developers on how to properly use Git and utilize the BitBucket repository to improve our collaboration as a team.
- Reviewed all pull requests to ensure the code was up to par and could merge without conflict.

Organization Involvement

Upsilon Pi Epsilon Society: DePaul University   *April 2017 - Present*
Member

- Admitted for being in the top 35% of students in the college of Computing and Digital Media.
- Collaborated with other members to help teach front-end languages - CSS, HTML, JavaScript, jQuery - in exchange for learning more about Ruby.
- Attended events and workshops to learn about newer web frameworks and languages.

Technical Skills & General Skills

- Strong proficiency in using semantic HTML5, CSS3, JavaScript, jQuery, and Git.
- Knowledgeable in AJAX, Ruby, and PHP.
- Proficient in using Ruby-on-Rails MVC framework.
- Extensive use with Bootstrap, CSS media queries, and jQuery screen/device width functions to develop fully responsive sites.
- Familiarity with using Angular.js and Node.js.
- Close attention to detail when developing and documenting code.
- Committed to learning new frameworks and languages whenever the opportunity arises.
- Strong understanding of user-centered web design principles and usability heuristics.
